

— Environmental policy —

In line with its values of respect and rigor, and in its capacity as a leading player in environmental management, CRI Environnement wishes to continuously strive to improve on its effort to protect the environment during the performance of its daily activities

Also, CRI Environnement Inc. is committed to:

- Systematize and control the operation of its business through the implementation, maintenance and improvement of effective measures to prevent environmental damage at the source.
- Demonstrate leadership in the management and protection of the environment.
- Subscribe to the concept of sustainable development and protection of natural resources through the implementation of salvaging, recycling and valorization policies.
- Encourage our partners to develop solutions to environmental problems, in connection to our role and mission in a perspective of continuous improvement.
- Foster the continuous improvement of its environmental management program and put in place the means to achieve its environmental objectives.
- Sensitize employees and ensure that respect for the environment is a collective concern, shared by all.
- Comply with all laws, regulations as well as municipal and government policies in matters of environmental protection.
- Plan the necessary emergency measures based on the risks and act with diligence and transparency in the case of an environmental accident.

CRI Environnement Inc., through its staff, ensures the development, implementation and monitoring of an environmental management system.
