

Health & Safety Policy

Policy statement

Recognizing that health and safety is a fundamental part of our concept of continuous quality improvement, the management of CRI Environnement wishes to signify its willingness to eliminate or control the risk of work accidents and / or work related illness, thus maintaining a safe and healthy work environment for their personnel.

General roles and responsibilities:

Management is committed to plan and direct the activities necessary for the implementation of OHS objectives and provide reasonable and achievable means to pursue these goals.

The Operations Supervisor ensures the achievement of the OHS objectives and supports stakeholders in the planning and implementation of OHS activities.

Team leaders promote, among workers under their responsibility, the implementation of OHS objectives they deem reasonable.

The health and safety committee supports and advises stakeholders in any activity that permits the prevention of accidents.

The employees respect the safety regulations, perform their tasks in a way so as not to expose themselves or their work colleagues to the risk of an accident and participate in prevention activities.

The management of CRI Environmental Inc. intends to integrate the values associated with health and safety at all levels of the company, namely the organization of work itself, the management of its human resources, the maintenance of its equipment, the purchase of its materials and finally its relations with subcontractors.

We therefore count on your cooperation to make our plant a workplace where even you and your colleagues could work in complete safety.

Health and safety, it's everyone's business and it's everyone's responsibility!
